

Timber Treatment Since 1848

The roots of our high-quality fencing materials lie in the year 1848 when Burt Boulton & Haywood Ltd. began supplying railway sleepers for the British mining industry. Today, our treated timber products are known for their outstanding quality and durability.

The family owned **Scanpole brand** will further strengthen the reputation of our treated fencing business. Scanpole makes utility poles for:

- British Telecom
- Scottish Power
- Scottish & Southern Electricity Networks
- Western Power Distribution
- UK Power Networks
- Northern Power Grid

Same Superior Quality**

Isn't it good Norwegian wood

Good for your pocket!

- Scanpole creosoted fencing is made with a desired service life of +40 years.
- Scanpole machine round fence posts are made from slow grown Norwegian scots pine trees.

Good for animal security & Good for the environment

- Creosote fencing can reduce the risk of horse cribbing & post chewing.
- Each m³ of wooden fencing has captured over a tonne of carbon and released 0.7 of a tonne of oxygen back into the atmosphere.

The same strict standard as electricity poles

The fencing material is creosoted in the UK & Norway to the same British standard as electricity poles.

Rounds · Cundy Peeled · Machine Round & Half Rounds Fence posts & rails · Sawn Timber Posts · Pyramid Top Gate Posts · Rails · Five Bar Field Gate
